

## Update to Child Development Center Re-Opening Plan

Please note the following update to our Re-Opening plan which can be found in the Introduction section:

The Child Development Center will implement a 4 week remote only program at the start of the 2020-2021 school year. This will include a phase in period, followed by continued remote instruction and teletherapy for students. During this time, our staff will move forward with necessary improvements and preparation of the school building site to maximize health and safety as we prepare to transition to our blended model as outlined in this document. Once the decision has made that it is safe for our school to open for in person services, we will then implement a 2 week on site phase in period in order to ensure that staff, families and students are fully prepared for a safe and smooth transition back to the school site.
